Project Design Phase-II

Data Flow Diagram & User Stories

Project Name: Automating Employee Data

Data Flow Diagrams (DFD)

DFD Level 0 (Context Diagram)

System: Employee Data Automation System

External Entities:
- Employee
- HR/Admin

Data Flow:
- Employee enters personal & work details
- System stores employee data
- HR/Admin retrieves and manages employee records
- System generates reports

DFD Level 1 (Detailed Flow)

Processes:
1. Employee Registration
2. Employee Login
3. Data Storage & Management
4. Data Update / Edit
5. Report Generation

Data Stores:
- Employee Database

Flow Explanation:
- Employee submits details → stored in database
- Login → access system
- Admin updates → database updated
- Reports generated for admin

User Stories

User Type	Epic	USN	User Story	Acceptance Criteria	Priority	Release

Employee	Registration	USN-1	Register with details	Account created	High	Sprint-1
Employee	Registration	USN-2	Receive confirmation	Confirmation received	High	Sprint-1
Employee	Login	USN-3	Login with ID/password	Login successful	High	Sprint-1
Employee	Profile	USN-4	View profile	Data displayed	Medium	Sprint-2
Employee	Update	USN-5	Update details	Changes saved	Medium	Sprint-2
Admin	Management	USN-6	View employees	List displayed	High	Sprint-1
Admin	Management	USN-7	Add employee	Employee added	High	Sprint-1
Admin	Management	USN-8	Edit employee	Data updated	High	Sprint-2
Admin	Management	USN-9	Delete employee	Record removed	Medium	Sprint-2
Admin	Reports	USN-10	Generate reports	Reports generated	Medium	Sprint-3
